## Product Description

### IPX3 IPX4 R1400 mm Elevatable Swing Pipe Rain Spray Tester with Flow Sensor

#### General specifications:

Outward Dimension	L2800*W800*H2000
Material	304 stainless steel
Power supply	220V/50HZ
Power	1.0kW

#### Product introduction:

This equipment boasts an adjustable swing tube height facilitated by a lifting system, accommodating varying product dimensions and testing specifications by altering both its elevation and tilt. This capability fosters the attainment of superlative testing outcomes. Additionally, the incorporation of a highly repeatable flow sensor minimizes variations among multiple measurement readings, underpinning the consistency and trustworthiness of the gathered data.

The counterweight is added at the bottom of the case to lower the center of gravity of the case and make the device more stable when swinging.

There is a water storage tank inside the equipment and a water level control system. When it is short of water, it will alarm.

The sample power socket (220V, 10A) is mounted under the control cabinet, which is convenient for the user to do the live test of the sample; and after the sample is powered on, the turntable rotation will be automatically adjusted to forward and reverse rotation to prevent winding<sup>5</sup>. The swing tube is driven by a servo motor, with precise swing angle and low noise.

Controller: 7-inch touch screen + PLC, using Yuexin self-developed software, which can be switched to multiple languages<sup>6</sup>.

Stainless steel counterweights are added at both ends of the swing tube to improve the fluency of swing and reduce the shaking range of the swing tube.

Universal casters are mounted on the bottom, which has good load-bearing and easy to move and fix the equipment.

Protection measures: short circuit protection, water shortage alert.
