

Touch Screen Controller IPX7-8 Water Immersion Test Equipment For Continuous Immersion And Touch Type Testing Method

Our Product Introduction

for more products please visit us on raintestchambers.com

Basic Information

- Brand Name: YUEXIN
- Certification: ISO 20653,DIN 40050,IEC 60529
- Model Number: YX-IPX8-80IT-250L
- Minimum Order Quantity: 1 Pcs
- Price: Usd+20000-50000+pcs
- Packaging Details: Wooden Box Package
- Delivery Time: 30-45 Days
- Payment Terms: T/T
- Supply Ability: 100+pcs+30

Product Specification

- Steel Ruler Accuracy: 1mm
- Type: Touch Type
- Operating Scenarios: Immersion Environment
- Test Method: Continuous Immersion
- Sight Window: Toughened Glass
- Simulation Depth: 80 M
- Product Title: IPX8 Water Immersion Test Chamber
- Glass Material: Toughened Glass
- Control Method: Independent Control Cabinet
- Highlight: **Continuous Immersion Water Immersion Test Equipment**
Touch Screen IPX7-8 Water Immersion Test Equipment

Product Description

Touch Screen Controller IPX7-8 Water Immersion Test Equipment for Continuous Immersion and Touch Type Testing Method

Product Description:

Featuring a sight window made of toughened glass, the IPX8 Water Immersion Test Chamber provides a clear view of the testing process while ensuring durability and safety. The toughened glass material offers excellent protection against water ingress and allows operators to monitor the test samples easily during the immersion testing process.

Utilizing the continuous immersion test method, this immersion testing machine subjects the test samples to prolonged exposure to water to evaluate their resistance to water ingress. The IPX8 Water Immersion Test Chamber simulates real-world immersion scenarios, making it suitable for assessing the water resistance of a wide range of products that may be exposed to immersion environments.

Whether testing electronic devices, automotive components, or outdoor equipment, the IPX8 Water Immersion Test Chamber provides a reliable and efficient testing solution. Its robust construction and user-friendly interface make it easy to set up and operate, ensuring consistent and repeatable test results for various applications.

With its advanced features and precise control capabilities, the IPX8 Water Immersion Test Chamber offers a versatile testing platform for manufacturers, quality control labs, and research institutions. This immersion testing machine is designed to meet industry standards for water resistance testing, providing accurate and reliable results for product development and certification processes.

In summary, the IPX8 Water Immersion Test Chamber is a state-of-the-art water immersion test equipment that offers unparalleled performance and reliability for assessing the water resistance of products. With its toughened glass sight window, continuous immersion test method, and suitability for immersion environments, this IPX8 waterproof chamber is the ideal choice for conducting comprehensive and accurate immersion testing.

Details:

tank

pressure regulating valve

Features:

Product Name: IPX7-8 Water Immersion Test Equipment
Test Method: Continuous Immersion
Operating Scenarios: Immersion Environment
Controller: Touch Screen
Control Method: Independent Control Cabinet
Glass Material: Toughened Glass

Technical Parameters:

Test Method	Continuous Immersion
Glass Material	Toughened Glass
Operating Scenarios	Immersion Environment
Product Title	IPX8 Water Immersion Test Chamber
Sight Window	Toughened Glass
Control Method	Independent Control Cabinet
Steel Ruler Accuracy	1mm
Type	Touch Type
Controllor	Touch Screen

Applications:

The YUEXIN IPX8 Water Immersion Test Chamber is a top-of-the-line product originating from Guangdong, China. This immersion test chamber is designed for a wide range of product application occasions and scenarios due to its durability and reliability. With certifications such as ISO 20653, DIN 40050, and IEC 60529, the YUEXIN IPX8 Water Immersion Test Chamber ensures high quality and performance standards. The minimum order quantity for this product is 1 piece, making it accessible for various businesses and industries.

Operating in immersion environments, this touch-type immersion soaking test chamber is ideal for conducting continuous immersion tests. The independent control cabinet allows for precise control and monitoring of the testing process.

Whether you are in the electronic, automotive, or aerospace industry, the YUEXIN IPX8 Water Immersion Test Chamber is suitable for testing the water resistance of your products. It is perfect for simulating real-world conditions and ensuring the reliability of your devices. Packaged in a sturdy wooden box, this immersion soaking test chamber is delivered within 30-45 days from the order date. The payment terms accepted are T/T, providing convenience for customers.

With a supply ability of over 100 pieces per month, the YUEXIN IPX8 Water Immersion Test Chamber is readily available for your testing needs. The price ranges from USD 20,000 to 50,000 per piece, depending on the quantity ordered.

Support and Services:

The IPX7-8 Water Immersion Test Equipment product is designed to provide reliable technical support and services to ensure the proper functioning and accurate testing of products that require IPX7 and IPX8 water immersion testing. Our team of experts is dedicated to assisting customers in setting up and using the equipment, troubleshooting any issues that may arise, and providing training on proper usage and maintenance. Additionally, we offer calibration services to guarantee the accuracy and precision of the test results. Trust our technical support and services to help you get the most out of your IPX7-8 Water Immersion Test Equipment.
