

## Toughened Glass Material Water Immersion Test Equipment With IPX8 Rating

Our Product Introduction

for more products please visit us on raintestchambers.com

### Basic Information

- Brand Name: YUEXIN
- Certification: ISO 20653,DIN 40050,IEC 60529
- Model Number: YX-IPX8-50IT-250L
- Minimum Order Quantity: 1 Pcs
- Price: Usd+20000-50000+pcs
- Packaging Details: Wooden Box Package
- Delivery Time: 30-45 Days
- Payment Terms: T/T
- Supply Ability: 100+pcs+30

### Product Specification

- Controller: Touch Screen
- Control Method: Independent Control Cabinet
- Glass Material: Toughened Glass
- Type: Touch Type
- Sight Window: Toughened Glass
- Operating Scenarios: Immersion Environment
- Test Method: Continuous Immersion
- Product Title: IPX8 Water Immersion Test Chamber
- Simulation Depth: 50 M
- Highlight: IPX8 Water Immersion Test Equipment, Material Water Immersion Test Equipment, Toughened Glass Water Immersion Test Equipment

## Product Description

### Toughened Glass Material Water Immersion Test Equipment with IPX8 Rating

#### Product Description:

Featuring a toughened glass sight window, this immersion test chamber allows users to observe the testing process clearly and securely. The touch type interface provides easy operation and control, making it convenient to set up and monitor the immersion test procedures. The IPX8 Water Immersion Test Chamber is suitable for operating in immersion environments, providing a controlled setting for conducting immersion tests effectively.

Whether you are testing electronic devices, outdoor equipment, or industrial components, the IPX8 Water Immersion Test Chamber offers a reliable testing solution to evaluate the waterproof performance of your products. By subjecting items to continuous immersion, this immersion testing machine simulates real-world scenarios to determine their resistance to water ingress and evaluate their overall durability.

The IPX8 Water Immersion Test Chamber is an indispensable tool for manufacturers, quality control departments, and research facilities seeking to validate the waterproof capabilities of their products. With its robust design and user-friendly features, this immersion test chamber streamlines the testing process and delivers consistent and accurate results.

Investing in the IPX8 Water Immersion Test Chamber allows you to conduct immersion tests with confidence, knowing that your products will undergo thorough and reliable evaluation. Whether you need to meet industry standards or ensure the durability of your products in wet environments, this immersion test chamber provides the necessary testing capabilities to support your quality assurance efforts.

In conclusion, the IPX8 Water Immersion Test Chamber is a top-of-the-line immersion testing machine that offers precise testing capabilities for evaluating the waterproof performance of products. With its durable construction, touch type interface, and immersion testing capabilities, this immersion test chamber is the ideal solution for conducting immersion tests in various industries. Invest in the IPX8 Water Immersion Test Chamber today and enhance the quality and reliability of your products through comprehensive immersion testing.

#### Features:

Product Name: IPX7-8 Water Immersion Test Equipment

Type: Touch Type

Glass Material: Toughened Glass

Product Title: IPX8 Water Immersion Test Chamber

Test Method: Continuous Immersion

Steel Ruler Accuracy: 1mm

#### Detail photos:

Magnetic level gauge

lid

Technical Parameters:

Type	Touch Type
Control Method	Independent Control Cabinet
Steel Ruler Accuracy	1mm
Test Method	Continuous Immersion
Sight Window	Toughened Glass
Operating Scenarios	Immersion Environment
Controller	Touch Screen
Glass Material	Toughened Glass
Product Title	IPX8 Water Immersion Test Chamber

Applications:

The YUEXIN IPX8 Water Immersion Test Chamber is a top-of-the-line product designed to meet the highest standards of quality and performance. This water immersion test equipment is perfect for a wide range of applications and scenarios, making it a versatile and essential tool for various industries.

With its IPX8 rating, this waterproof chamber is ideal for testing the water resistance of various products, ensuring that they can withstand immersion in water up to a depth of 1 meter for extended periods. This makes it perfect for testing electronic devices, outdoor equipment, and other products that need to be waterproof.

Whether you are a manufacturer looking to ensure the quality of your products or a testing facility in need of reliable equipment, the YUEXIN IPX8 Water Immersion Tank is the perfect solution. It is designed and manufactured in Guangdong, China, following strict guidelines and standards to guarantee its quality and reliability.

With certifications such as ISO 20653, DIN 40050, and IEC 60529, you can trust that this water immersion test equipment meets the highest industry standards. The toughened glass sight window and steel ruler accuracy of 1mm further enhance its precision and durability.

When you order the IPX8 Water Immersion Test Chamber, you can expect a minimum order quantity of 1 piece, packaged securely in a wooden box for safe delivery. The price ranges from USD 20,000 to 50,000 per piece, with a delivery time of 30-45 days. Payment terms are flexible, with T/T accepted, and a supply ability of over 100 pieces within 30 days.

Equipped with a touch screen controller, the IPX8 Water Immersion Tank is easy to operate and provides accurate results for your testing needs. Whether you are conducting routine quality checks or comprehensive product testing, this waterproof chamber is a reliable and efficient solution.

Support and Services:

The IPX7-8 Water Immersion Test Equipment is designed to provide reliable testing for products that require water resistance certification. Our product technical support team is available to assist you with any questions or issues you may encounter during the setup or operation of the equipment.

In addition to technical support, we also offer a range of services to ensure that your testing equipment is operating at its best. This includes regular maintenance, calibration, and repair services to keep your equipment in top condition.
