

Stainless Steel Immersion Testing Machine For Precise Button Type Testing And Efficiency

Our Product Introduction

for more products please visit us on raintestchambers.com

Basic Information

- Brand Name: YUEXIN
- Certification: ISO 20653,DIN 40050,IEC 60529
- Model Number: YX-IPX8-10A-600L
- Minimum Order Quantity: 1 Pcs
- Price: Usd+20000-50000+pcs
- Packaging Details: Wooden Box Package
- Delivery Time: 30-45 Days
- Payment Terms: T/T
- Supply Ability: 100+pcs+30

Product Specification

- Simulation Depth: 10 M
- Power Supply: 220V/50Hz
- Waterproof Level: IPX7-8
- Water Supply Method: Automatic Water Supply
- Product Description: Water Immersion Test Chamber
- Material: Stainless Steel
- Type: Button Type
- Water Temperature: 25
- Capacity: 600L
- Highlight: Stainless Steel Immersion Testing Machine, Precise Button Type Immersion Testing Machine, Efficiency Immersion Testing Machine

Product Description

Stainless Steel Immersion Testing Machine for Precise Button Type Testing and Efficiency

Product Description:

The IPX7-8 Water Immersion Test Equipment is a top-of-the-line product designed for conducting precise and reliable immersion tests on a wide range of electronic devices and equipment. With its advanced features and durable construction, this immersion test chamber ensures thorough testing in accordance with IPX7-8 waterproof standards.

Equipped with an Automatic Water Supply system, this immersion test chamber offers a convenient and efficient way to maintain the required water levels during testing. The automatic water supply method ensures consistent and accurate results, making it ideal for quality control and product evaluation purposes.

Operating on a power supply of 220V/50Hz, this immersion test chamber is capable of handling rigorous testing procedures while maintaining stable and reliable performance. The power supply requirements ensure that the equipment operates seamlessly, providing continuous and uninterrupted testing for various applications.

Constructed with high-quality Stainless Steel material, the immersion test chamber is built to withstand harsh testing environments and frequent use. The stainless steel construction not only enhances the durability and longevity of the equipment but also ensures resistance to corrosion and rust, making it an ideal choice for long-term testing requirements.

The IPX7-8 Waterproof Level of this immersion test chamber signifies its ability to withstand water immersion up to a depth of 1 meter for a specific duration, as per the IPX7-8 standards. This waterproof level ensures that the equipment can effectively simulate real-world conditions and provide accurate test results for assessing the water resistance of electronic devices.

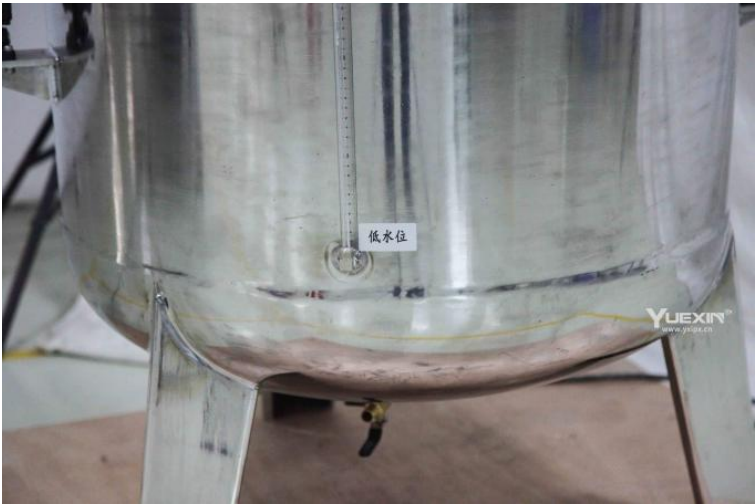

With a Water Temperature of 25 , this immersion test chamber maintains a consistent and controlled temperature environment during testing. The optimal water temperature setting ensures that the test conditions remain stable and reliable, allowing for accurate evaluation of the waterproof capabilities of the tested devices.

Overall, the IPX7-8 Water Immersion Test Equipment is a versatile and reliable solution for conducting immersion tests with precision and efficiency. Its advanced features, automatic water supply method, durable stainless steel construction, and compliance with IPX7-8 waterproof standards make it an essential tool for industries requiring accurate and consistent testing results.

Features:

Product Name: IPX7-8 Water Immersion Test Equipment
Water Supply Method: Automatic Water Supply
Test Depth: 10 M
Material: Stainless Steel
Type: Button Type
Product Description: Water Immersion Test Chamber

Technical Parameters:

| | |
|---------------------|------------------------------|
| Waterproof Level | IPX7-8 |
| Water Temperature | 25 |
| Material | Stainless Steel |
| Product Description | Water Immersion Test Chamber |
| Power Supply | 220V/50Hz |
| Pressure Accuracy | 1 KPa |
| Test Depth | 10 M |
| Type | Button Type |
| Water Supply Method | Automatic Water Supply |

Applications:

YUEXIN IPX7-8 Water Immersion Test Equipment is a cutting-edge product designed for a variety of product testing scenarios. With its waterproof level of IPX7-8, this immersion test chamber is ideal for testing the water resistance of various electronic devices, gadgets, and equipment.

Whether you are a manufacturer looking to ensure the quality and durability of your products or a research facility in need of reliable testing equipment, the YUEXIN IPX7-8 Water Immersion Test Equipment is a versatile solution. This product, originating from Guangdong, China, boasts certifications such as ISO 20653, DIN 40050, and IEC 60529, ensuring its quality and reliability.

The minimum order quantity for this immersion test chamber is just 1 piece, making it accessible for both small-scale testing needs and large-scale production facilities. The price range for the YUEXIN IPX7-8 Water Immersion Test Equipment is USD 20,000 to 50,000 per piece, providing great value for its advanced features.

When it comes to packaging and delivery, this product comes in a sturdy wooden box package to ensure safe transportation. The delivery time is estimated to be between 30 to 45 days, allowing you to quickly set up your testing operations. Payment terms for this equipment are flexible, with options for T/T transactions.

With a supply ability of over 100 pieces per month, the YUEXIN IPX7-8 Water Immersion Test Equipment is readily available to meet your testing needs. The water temperature for testing is set at 25 , and the water supply method is automatic, simplifying the testing process.

Constructed from durable stainless steel, this button-type immersion test chamber is built to last and withstand rigorous testing conditions. Whether you are testing smartphones, smartwatches, or other electronic devices, the YUEXIN IPX7-8 Water Immersion Test Equipment is the perfect choice for your waterproof testing requirements.

Packing and Shipping:

Product Name: IPX7-8 Water Immersion Test Equipment
Description: This equipment is designed to test the water immersion resistance of products according to IPX7 and IPX8 standards.

Package Includes: IPX7-8 Water Immersion Test Equipment, power cord, user manual
Shipping: This product will be securely packaged to ensure safe delivery. Shipping options include standard ground shipping and expedited shipping.
