

PLC Control IPX1-2 Water Immersion Test Apparatus for IPX12 Testing Needs

Our Product Introduction

For more products please visit us on raintestchambers.com

Basic Information

- Brand Name: YUEXIN
- Certification: ISO 20653:2013, DIN 40050-9:1993, IEC60529:2013, VW 80000:2017
- Model Number: YX-IPX12A-2400
- Minimum Order Quantity: 1 Piece
- Price: Usd+20000-50000+pcs
- Packaging Details: Wooden Box Package
- Delivery Time: 30-45 Days
- Payment Terms: T/T
- Supply Ability: 100+pcs+30

Product Specification

- Material: Stainless Steel
- Control System: PLC
- Power Supply: AC 220V, 50Hz
- Drip Volume: 1mm/min
- Display: Touch Screen
- Ip Grade: IPX12
- Test Standard: IEC 60529
- Test Time: 10 Minutes
- Highlight: IPX12 Water Immersion Test Apparatus, IPX1-2 Water Immersion Test Apparatus, PLC Control Water Immersion Test Apparatus

Product Description

PLC Control IPX1-2 Water Immersion Test Apparatus Top Choice:

Product Description:

The IPX1-2 Moisture Ingress Test System is an advanced testing equipment designed to assess the level of protection of products against water ingress according to the IPX1-2 standard. This IPX1-2 Dripping Test Apparatus is equipped with a user-friendly Touch Screen display, allowing for easy operation and monitoring of test parameters. Constructed with high-quality Stainless Steel material, this IPX1-2 Rain Drip Test Equipment ensures durability and reliability during testing procedures. The robust design of the equipment enhances its longevity and performance, making it a valuable asset for testing laboratories and quality control departments.

The primary test method conducted by the IPX1-2 Water Drip Test Equipment is the Drip Test, which involves exposing the product under evaluation to water dripping at a specified rate and angle. This method helps simulate real-life scenarios where products may be exposed to dripping water, allowing manufacturers to assess the effectiveness of their product's sealing and protection against moisture ingress. Operating on a Power Supply of AC 220V, 50Hz, this IPX1-2 Moisture Ingress Test System is compatible with standard electrical outlets, making it easy to integrate into different testing environments. The consistent power supply ensures stable and accurate testing results,

providing reliable data for product evaluation and improvement.

With its IPX1-2 rating, this Dripping Test Apparatus offers a comprehensive solution for assessing the ingress protection capabilities of various products, including electronic devices, lighting fixtures, automotive components, and more. The IPX1-2 Rain Drip Test Equipment is suitable for testing products that require protection against vertical dripping water or light rain exposure, helping manufacturers ensure the quality and reliability of their products under challenging environmental conditions.

Overall, the IPX1-2 Water Drip Test Equipment is a versatile and efficient testing instrument that meets the stringent requirements of the IPX1-2 standard. Its advanced features, durable construction, and user-friendly interface make it an essential tool for conducting accurate and reliable moisture ingress tests, enabling manufacturers to enhance the performance and durability of their products.

Details:

lifting bracket

caster

Features:

Product Name: IPX1-2 Water Drip Test Equipment

Control System: PLC

Test Standard: IEC 60529

IP Grade: IPX12

Test Time: 10 Minutes

Distance Between Nozzles: 20mm

Technical Parameters:

IP Grade	IPX1-2
Distance Between Nozzles	20mm
Drip Volume	1mm/min
Control System	PLC
Test Method	Drip Test
Display	Touch Screen
Test Standard	IEC 60529
Power Supply	AC 220V, 50Hz
Material	Stainless Steel
Turntable Tilt	0°or 15°

Applications:

The YUEXIN IPX1-2 Water Drip Test Equipment, also known as the IPX1-2 Moisture Ingress Test System, is a versatile testing device with a wide range of product application occasions and scenarios. Designed and manufactured in Guangdong, China, this equipment is built to meet high industry standards and certifications including ISO 20653:2013, DIN 40050-9:1993, IEC60529:2013, and VW 80000:2017.

Whether you are in the electronics, automotive, lighting, or home appliance industry, this IPX1-2 Drip Protection Test Device is essential for testing the water resistance of your products. The IPX1-2 Water Dripping Proof Tester is ideal for conducting tests according to the IEC 60529 standard, ensuring that your products meet the necessary waterproofing requirements.

With a minimum order quantity of 1 piece and a price range of USD 20,000 to 50,000 per piece, the YUEXIN IPX1-2 Water Drip Test Equipment comes in a sturdy wooden box package for secure transportation. The delivery time for this equipment is estimated to be between 30 to 45 days, with payment terms accepted via T/T.

The IPX1-2 Moisture Ingress Test System features a touch screen display and a control system operated by a PLC. The turntable tilt can be set at either 0° or 15°, providing flexibility for different testing needs. The distance between nozzles is 20mm, allowing for accurate and precise water dripping tests.

With a supply ability of 100+ pieces every 30 days, this IPX1-2 Water Drip Test Equipment is a reliable and efficient solution for testing the water resistance of various products. Invest in this high-quality testing device to ensure the durability and reliability of your products in challenging environments.

Customization:

Product Customization Services for the IPX1-2 Water Drip Test Equipment:

- Brand Name: YUEXIN
- Place Of Origin: Guangdong, China
- Certification: ISO 20653:2013, DIN 40050-9:1993, IEC60529:2013, VW 80000:2017
- Minimum Order Quantity: 1 Piece
- Price: Usd+20000-50000+pcs
- Packaging Details: Wooden Box Package
- Delivery Time: 30-45 Days
- Payment Terms: T/T
- Supply Ability: 100+pcs+30
- Material: Stainless Steel
- Turntable Tilt: 0°or 15°
- Display: Touch Screen
- Test Method: Drip Test
- Test Standard: IEC 60529
