

Touch Screen Display IPX1-2 Rainfall Test Equipment for Stainless Steel

Our Product Introduction

for more products please visit us on raintestchambers.com

Basic Information

- Brand Name: YUEXIN
- Certification: ISO 20653:2013, DIN 40050-9:1993, IEC60529:2013, VW 80000:2017
- Model Number: YX-IPX12B-400
- Minimum Order Quantity: 1 Piece
- Price: Usd+20000-50000+pcs
- Packaging Details: Wooden Box Package
- Delivery Time: 30-45 Days
- Payment Terms: T/T
- Supply Ability: 100+pcs+30

Product Specification

- Features: Waterproof Test
- Test Method: Drip Test
- Protection Level: IPX1-2
- Test Time: 10 Minutes
- Material: Stainless Steel
- Test Chamber Material: Stainless Steel
- Rotating Speed: 1-5 Rounds Per Minute
- Drip Volume: 1-2 Mm/min

Product Description

IPX1-2 Rainfall Test Equipment for Stainless Steel Applications and More

Product Description:

Constructed with high-quality stainless steel, the test chamber of this IPX1-2 Moisture Ingress Test System offers durability and resistance to corrosion, ensuring longevity and consistent performance. The robust design of the equipment provides a secure testing environment, allowing for precise control and monitoring of the testing process.

One of the key features of the IPX1-2 Moisture Ingress Test System is its ability to conduct waterproof tests with ease and efficiency. The equipment simulates conditions of light rain or dripping water, making it ideal for assessing the protection level of products against moisture ingress. With a drip distance of 200 mm and a test time of 10 minutes, this equipment offers a comprehensive evaluation of product performance under different moisture exposure scenarios.

With an IP Grade of IPX12, the IPX1-2 Rainfall Test Equipment is capable of providing detailed insights into the waterproof capabilities of products. By subjecting products to controlled water exposure, manufacturers can validate the effectiveness of their designs and materials in preventing moisture intrusion, ensuring compliance with industry standards and regulations.

Whether you are in the electronics, automotive, or outdoor equipment industry, the IPX1-2 Moisture Ingress Test System is an invaluable tool for enhancing product quality and reliability. By investing in this advanced testing equipment, you can optimize your product development process, identify potential weaknesses, and deliver superior products that meet the highest standards of waterproof performance.

Features:

Product Name: IPX1-2 Water Drip Test Equipment

Test Time: 10 Minutes

Test Chamber Material: Stainless Steel

Display: Touch Screen

Material: Stainless Steel

Drip Distance: 200 mm

Technical Parameters:

Test Method	Drip Test
Test Time	10 Minutes
Drip Volume	1-2 mm/min
Drip Distance	200 mm
Features	Waterproof Test
IP Grade	IPX12
Protection Level	IPX1-2
Test Chamber Material	Stainless Steel
Rotating Speed	1-5 Rounds Per Minute
Display	Touch Screen

Applications:

The YUEXIN IPX1-2 Water Drip Test Equipment is a top-of-the-line product originating from Guangdong, China. This innovative tool is designed for conducting precise and reliable IPX1-2 water resistance assessments in various scenarios.

One of the key application occasions for the IPX1-2 Waterproof Drip Testing Machine is in quality control laboratories and research facilities where products need to be tested for their resistance to water ingress. This apparatus is ideal for assessing the durability and reliability of electronic devices, lighting fixtures, automotive components, and other products that require IPX1-2 level protection.

Furthermore, the IPX1-2 Dripping Test Apparatus finds extensive use in manufacturing plants and production lines to ensure that products meet the required waterproofing standards. With its certification to ISO 20653:2013, DIN 40050-9:1993, IEC60529:2013, and VW 80000:2017, this equipment guarantees accurate and consistent testing results.

Businesses looking to invest in this essential tool can benefit from its affordable minimum order quantity of just 1 piece. The price range of USD 20,000 to 50,000 per piece makes it a cost-effective solution for companies of all sizes. The equipment is carefully packaged in wooden boxes to ensure safe transportation and arrives within 30-45 days, allowing for quick deployment in testing facilities.

Payment terms for the IPX1-2 Water Drip Test Equipment are flexible, with T/T options available to facilitate smooth transactions. The

supply ability of over 100 pieces per month ensures that businesses can scale their testing capabilities as needed. Constructed from high-quality stainless steel, both the test chamber and the equipment itself are durable and long-lasting. The IPX12 protection level and IPX1-2 rating make this apparatus a reliable choice for comprehensive water resistance testing. In conclusion, the YUEXIN IPX1-2 Water Drip Test Equipment is a versatile and essential tool for performing accurate IPX1-2 water resistance assessments across a wide range of industries and applications. Its robust construction, certification, and user-friendly design make it a valuable asset for businesses seeking to enhance their product quality and reliability.

Packing and Shipping:

Product Name: IPX1-2 Water Drip Test Equipment
Description: This IPX1-2 Water Drip Test Equipment is designed to test the protection against water drips for products.
Package Contents: - IPX1-2 Water Drip Test Equipment - User Manual - Power Cable
Shipping Information: - Shipping Method: Standard Shipping - Estimated Delivery Time: 5-7 business days - Shipping Cost: Calculated at checkout
