

## Waterproof Test IPX1-2 Water Dripping Proof Tester for Dripping Rain Test

Our Product Introduction

for more products please visit us on [raintestchambers.com](http://raintestchambers.com)

### Basic Information

- Brand Name: YUEXIN
- Certification: ISO 20653:2013, DIN 40050-9:1993, IEC60529:2013, VW 80000:2017
- Model Number: YX-IPX12B-800
- Minimum Order Quantity: 1 Piece
- Price: Usd+20000-50000+pcs
- Packaging Details: Wooden Box Package
- Delivery Time: 30-45 Days
- Payment Terms: T/T
- Supply Ability: 100+pcs+30

### Product Specification

- Features: Waterproof Test
- Protection Level: IPX1-2
- Ip Grade: IPX12
- Drip Volume: 1-2 Mm/min
- Rotating Speed: 1-5 Rounds Per Minute
- Test Time: 10 Minutes
- Drip Distance: 200 Mm
- Material: Stainless Steel

## Product Description

### Waterproof Test IPX1-2 Water Dripping Proof Tester Water Resistance Testing

#### Product Description:

Featuring a user-friendly touch screen display, the IPX1-2 Water Drip Test Equipment offers easy operation and intuitive control. The touch screen interface allows users to set up tests, monitor the progress, and analyze the results with ease, making it a convenient and efficient tool for testing applications.

Constructed with high-quality stainless steel material, this device is built to withstand the rigors of testing environments. The durable stainless steel construction ensures long-lasting performance and provides excellent protection against corrosion, making it a reliable choice for testing laboratories and quality control facilities.

One of the key features of the IPX1-2 Water Drip Test Equipment is its waterproof test capability. This device is specifically designed to simulate water drip conditions as per the IPX1 and IPX2 standards, making it an essential tool for conducting rain drip tests. With the ability to accurately replicate water drip scenarios, this equipment allows users to assess the water resistance of products effectively. The IPX1-2 Water Drip Test Equipment offers adjustable rotating speed settings, allowing users to control the rotation speed from 1 to 5 rounds per minute. This flexibility enables users to customize the testing parameters based on their specific requirements, ensuring accurate and precise testing results.

With a drip distance of 200 mm, this device provides consistent and uniform water drip coverage during testing. The specified drip distance ensures that products are subjected to a controlled water drip environment, allowing for thorough evaluation of their water resistance capabilities.

Whether conducting IPX1 or IPX2 rain drip tests, the IPX1-2 Water Drip Test Equipment delivers reliable and repeatable results. This versatile testing device is ideal for a wide range of applications, including electronics, automotive, aerospace, and more. With its advanced features and durable construction, this equipment is a valuable asset for any testing facility looking to assess the water resistance of products accurately.

Invest in the IPX1-2 Water Drip Test Equipment today and experience the benefits of a high-quality testing device that is designed to meet your water drip testing needs. Enhance your testing capabilities and ensure product quality with this innovative and reliable IPX1-2 Rain Drip Test Equipment.

#### Features:

Product Name: IPX1-2 Water Drip Test Equipment

Protection Level: IPX1-2

Test Method: Drip Test

Rotating Speed: 1-5 Rounds Per Minute

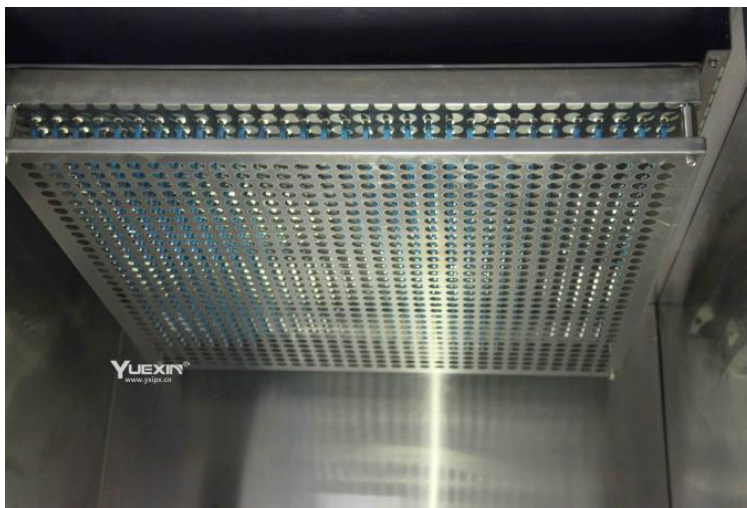

Ip Grade: IPX12

Features: Waterproof Test

#### Technical Parameters:

Material	Stainless Steel
Drip Distance	200 mm
Test Time	10 minutes
Test Chamber Material	Stainless Steel
Features	Waterproof Test
Rotating Speed	1-5 Rounds Per Minute
IP Grade	IPX12
Drip Volume	1-2 mm/min
Display	Touch Screen
Test Method	Drip Test

#### Details

Drip board

Control panel

## Applications:

The YUEXIN IPX1-2 Water Drip Test Equipment, also known as the IPX1-2 Moisture Ingress Test System, is a top-of-the-line waterproof testing machine designed for a variety of product application occasions and scenarios. Manufactured in Guangdong, China, this equipment meets the highest standards and certifications including ISO 20653:2013, DIN 40050-9:1993, IEC60529:2013, and VW 80000:2017.

With a minimum order quantity of just 1 piece and a price range of USD 20,000 to 50,000+ per piece, the IPX1-2 Waterproof Drip Testing Machine is a cost-effective solution for businesses of all sizes. Each unit is carefully packaged in a wooden box for safe delivery, with an estimated delivery time of 30-45 days. Payment terms are flexible and can be arranged via T/T.

The YUEXIN IPX1-2 Rain Drip Test Equipment has a supply ability of 100+ units per month, making it readily available for various industries and testing facilities. Its drip volume ranges from 1-2 mm/min, ensuring accurate and consistent results during testing. Constructed from high-quality stainless steel, both the test chamber and material of the equipment are durable and long-lasting. The IPX1-2 Waterproof Drip Testing Machine is equipped with features that make it ideal for waterproof testing, providing reliable and precise results. The rotating speed of 1-5 rounds per minute allows for thorough testing of products under different conditions.

## Packing and Shipping:

Product Name: IPX1-2 Water Drip Test Equipment

Description: This IPX1-2 Water Drip Test Equipment is designed to test the water ingress protection of products according to IPX1 and IPX2 standards.

Package includes:

- IPX1-2 Water Drip Test Equipment
- Power cord
- User manual

Shipping Information:

- Shipping Method: Standard Shipping
- Estimated Delivery Time: 5-7 business days
