Basic Information

- Brand Name: YUEXIN
- Certification: ISO 20653:2013, DIN 40050-9:1993, IEC60529:2013, VW 80000:2017
- Model Number: YX-IPX12B-1000
- Minimum Order Quantity: 1 Piece
- Price: Usd+20000-50000+pcs
- Packaging Details: Wooden Box Package
- Delivery Time: 30-45 Days
- Payment Terms: T/T
- Supply Ability: 100+pcs+30

Product Specification

- Features: Waterproof Test
- Test Time: 10 Minutes
- Test Method: Drip Test
- Ip Grade: IPX12
- Test Chamber Material: Stainless Steel
- Protection Level: IPX1-2
- Drip Volume: 1-2 Mm/min
- Display: Touch Screen

Product Description

Waterproof Test IPX1-2 Water Drip Test Equipment Stainless Steel 1-2 Mm/min

Product Description:

Featuring a user-friendly touch screen display, the IPX1-2 Drip Protection Test Device offers easy operation and real-time monitoring of the testing process. The touch screen interface allows users to set parameters, view test data, and analyze results with precision and efficiency.

With a drip volume of 1-2 mm/min, the IPX1-2 Dripping Test Apparatus simulates water dripping conditions to evaluate the effectiveness of a product's protection against water ingress. The controlled drip rate ensures consistent and repeatable testing, making it ideal for quality control and product development purposes.

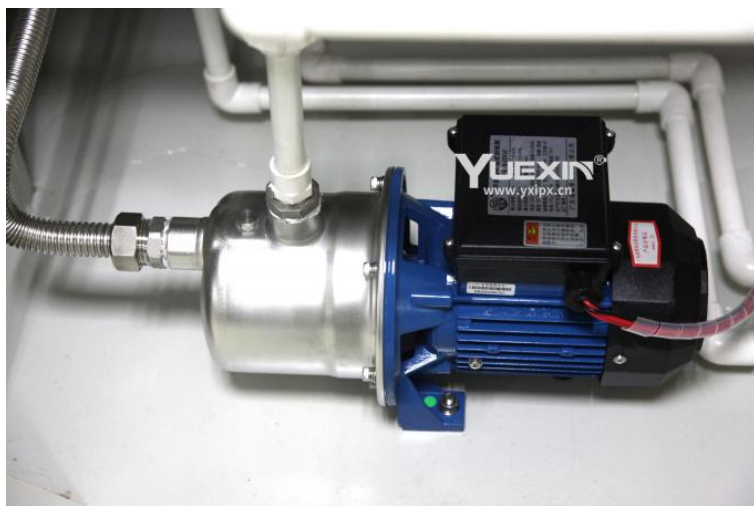

The test chamber of the IPX1-2 Water Dripping Proof Tester is constructed from high-quality stainless steel, providing durability and resistance to corrosion. The stainless steel material ensures a reliable testing environment and easy maintenance for long-term use. Equipped with an IP grade of IPX12, the IPX1-2 Water Drip Test Equipment offers a high level of protection against water intrusion, making it suitable for testing a wide range of products in various industries. The IPX12 rating guarantees the device's reliability and accuracy in assessing water resistance according to international standards.

In conclusion, the IPX1-2 Water Drip Test Equipment is an essential tool for manufacturers, quality control professionals, and product developers seeking to evaluate the water resistance of their products. With its touch screen display, precise drip volume control, stainless steel test chamber, and IPX12 protection level, this device provides comprehensive testing capabilities for ensuring product quality and performance.

Details:

water tank

water pump

Features:

Product Name: IPX1-2 Water Drip Test Equipment
Material: Stainless Steel
Rotating Speed: 1-5 Rounds Per Minute
Test Time: 10 Minutes
Test Method: Drip Test
IP Grade: IPX12

Technical Parameters:

Material	Stainless Steel
Display	Touch Screen
Protection Level	IPX1-2
Test Chamber Material	Stainless Steel
Rotating Speed	1-5 Rounds Per Minute
Ip Grade	IPX12
Test Time	10 Minutes
Drip Volume	1-2 Mm/min
Test Method	Drip Test
Features	Waterproof Test

Applications:

The YUEXIN IPX1-2 Water Drip Test Equipment, also known as the IPX1-2 Drip Protection Test Device, is a versatile and reliable testing apparatus that finds its application in various industries and scenarios. Manufactured in Guangdong, China, this equipment boasts certifications such as ISO 20653:2013, DIN 40050-9:1993, IEC60529:2013, and VW 80000:2017, ensuring high-quality performance and adherence to international standards. With a minimum order quantity of 1 piece and a price range of USD 20,000 to 50,000 per piece, the IPX1-2 Dripping Test Apparatus is an affordable yet efficient solution for businesses looking to conduct water ingress testing. The equipment is constructed with durable stainless steel, making it robust and long-lasting for repeated use. Its drip volume ranges from 1 to 2 mm/min, suitable for simulating light to moderate rainfall conditions. Utilizing the drip test method, the IPX1-2 Rainfall Test Equipment can simulate water dripping at a rate of 1 to 5 rounds per minute, with a drip distance of 200 mm, allowing for precise and controlled testing conditions. Packaged in a secure wooden box package, this equipment can be delivered within 30-45 days, with payment terms being T/T for convenience. Its supply ability of over 100 pieces ensures that businesses can acquire multiple units to meet their testing needs efficiently. In conclusion, the YUEXIN IPX1-2 Water Drip Test Equipment is a valuable asset for industries requiring reliable water ingress testing, offering versatility, durability, and precision in a single apparatus.

About us:

Packing and Shipping:

Product Name: IPX1-2 Water Drip Test Equipment

Description: This equipment is designed to test the ingress protection of products against water drips for IPX1 and IPX2 ratings.

Packaging: The IPX1-2 Water Drip Test Equipment will be securely packaged in a durable cardboard box with foam cushioning to ensure safe transportation.

Shipping: We will ship the equipment using a reliable courier service to ensure it reaches you in a timely manner. Tracking information will be provided for your convenience.
