Basic Information

- Brand Name: YUEXIN
- Certification: ISO 20653:2013, DIN 40050-9:1993, IEC60529:2013, VW 80000:2017
- Model Number: YX-IPX12BE-600
- Minimum Order Quantity: 1 Piece
- Price: Usd+20000-50000+pcs
- Packaging Details: Wooden Box Package
- Delivery Time: 30-45 Days
- Payment Terms: T/T
- Supply Ability: 100+pcs+30

Product Specification

- Features: Waterproof Test
- Test Method: Drip Test
- Rotating Speed: 1-5 Rounds Per Minute
- Display: Touch Screen
- Protection Level: IPX1-2
- Material: Stainless Steel
- Drip Distance: 200 Mm
- Test Time: 10 Minutes

Product Description

IPX1-2 Moisture Ingress Test System with 200 Mm Drip Distance

Product Description:

The IPX1-2 Water Drip Test Equipment is a high-quality device designed for conducting waterproof tests in accordance with IPX1-2 standards. This advanced equipment is an essential tool for assessing the water resistance of various products, ensuring they meet the required quality standards.

Constructed with durable stainless steel material, the IPX1-2 Drip Protection Test Device guarantees reliability and longevity in testing applications. Its robust build allows for repeated use without compromising accuracy or precision, making it a cost-effective solution for quality control processes.

The primary function of the IPX1-2 Rainfall Test Equipment is to simulate water dripping onto an object or product under test conditions. With a test time of 10 minutes, this device accurately evaluates the ingress protection of products against water drips, helping manufacturers identify any potential vulnerabilities or weaknesses in their designs.

Featuring a rotating speed range of 1-5 rounds per minute, the IPX1-2 Water Resistance Assessment Tool provides flexibility in testing different types of products with varying requirements. The adjustable rotating speed allows for customization based on the specific needs of the test, ensuring precise and consistent results every time.

Whether testing electronic devices, lighting fixtures, outdoor equipment, or any other products requiring water resistance assessment, the IPX1-2 Water Drip Test Equipment offers a reliable and efficient solution. Its user-friendly design and intuitive operation make it easy to use for both experienced professionals and beginners in the field of product testing.

By investing in the IPX1-2 Drip Protection Test Device, manufacturers can ensure that their products meet industry standards for water resistance, enhancing customer satisfaction and brand reputation. This equipment is a valuable asset for quality assurance processes, enabling companies to deliver superior products that withstand environmental challenges and deliver outstanding performance.

Details:

Features:

Product Name: IPX1-2 Water Drip Test Equipment
IP Grade: IPX12
Material: Stainless Steel
Display: Touch Screen
Rotating Speed: 1-5 Rounds Per Minute
Features: Waterproof Test

Technical Parameters:

Drip Volume	1-2 mm/min
Protection Level	IPX1-2
IP Grade	IPX12
Rotating Speed	1-5 Rounds Per Minute
Display	Touch Screen
Test Time	10 Minutes
Test Chamber Material	Stainless Steel
Material	Stainless Steel
Features	Waterproof Test
Drip Distance	200 mm

Applications:

The IPX1-2 Water Dripping Proof Tester by YUEXIN is a versatile and essential tool for conducting waterproof tests in various industries. Originating from Guangdong, China, this product is designed to meet the highest quality standards and has certifications including ISO 20653:2013, DIN 40050-9:1993, IEC60529:2013, and VW 80000:2017.

With a minimum order quantity of just 1 piece, the IPX1-2 Water Dripping Proof Tester is accessible to businesses of all sizes. The price range of USD 20,000 to 50,000 per piece makes it a cost-effective investment for companies looking to ensure the reliability of their products.

Packaged in a sturdy wooden box, this equipment ensures safe delivery to your location within 30-45 days. Payment terms are flexible with T/T options available, making the purchasing process convenient for buyers.

Constructed from durable stainless steel, the IPX1-2 Water Dripping Proof Tester is built to last and withstand rigorous testing conditions. Its key feature lies in its waterproof test capabilities, allowing users to assess the protection levels of their products accurately.

The IPX1-2 Waterproof Drip Testing Machine is specifically designed for IPX1-2 protection level testing, providing reliable results for products requiring this standard. With a supply ability of over 100 pieces within 30 days, YUEXIN ensures that businesses can acquire this essential testing equipment promptly.

Packing and Shipping:

Product: IPX1-2 Water Drip Test Equipment

Description: This equipment is designed to test the water resistance of products according to IPX1 and IPX2 standards.

Packaging: The IPX1-2 Water Drip Test Equipment will be securely packaged in a sturdy cardboard box with protective foam padding to ensure safe delivery.

Shipping: We will ship the product via a reliable courier service to ensure timely and safe delivery to your location.
