

Space-saving Water Drip Test Equipment with Screw lifting for IPX1 IPX2

Our Product Introduction

for more products please visit us on raintestchambers.com

Basic Information

- Brand Name: YUEXIN
- Certification: ISO 20653:2013, DIN 40050-9:1993, IEC60529:2013, VW 80000:2017
- Model Number: YX-IPX12C-1200
- Minimum Order Quantity: 1 Piece
- Price: Usd+20000-50000+pcs
- Packaging Details: Wooden Box Package
- Delivery Time: 30-45 Days
- Payment Terms: T/T
- Supply Ability: 100+pcs+30

Product Specification

- Features: Waterproof Test
- Protection Level: IPX1-2
- Test Method: Drip Test
- Drip Volume: 1-2 Mm/min
- Rotating Speed: 1-5 Rounds Per Minute
- Material: Stainless Steel
- Display: Touch Screen
- Ip Grade: IPX12

Product Description

1-2 Mm/min Drip Volume IPX1-2 Water Drip Test Equipment

Product Description:

The IPX1-2 Water Drip Test Equipment is a state-of-the-art product designed to perform comprehensive testing for water ingress protection according to IPX1-2 standards. This equipment is constructed with high-quality stainless steel material, ensuring durability and reliability in various testing environments.

With a precise drip volume control ranging from 1 to 2 mm/min, the IPX1-2 Rainfall Test Equipment provides accurate simulation of water drip conditions for testing the ingress protection of electronic devices, luminaires, and other products against water intrusion.

Featuring an IP grade of IPX1-2, this Drip Protection Test Device is capable of evaluating the resistance of products to water drips coming from a 200 mm distance above the product surface. The IPX1-2 rating signifies the equipment's ability to protect against vertically falling water drops, making it suitable for a wide range of industries requiring reliable water ingress testing.

The IPX1-2 Water Drip Test Equipment is equipped with a user-friendly touch screen display, allowing operators to easily set test parameters, monitor test progress, and access test results efficiently. The touch screen interface enhances the usability of the equipment, making it convenient for users to navigate through various settings and data during testing procedures.

Overall, the IPX1-2 Rainfall Test Equipment offers a comprehensive solution for conducting accurate and reliable water ingress protection tests in compliance with IPX1-2 standards. Its robust stainless steel construction, precise drip volume control, IPX1-2 rating, 200 mm drip distance capability, and intuitive touch screen display make it an indispensable tool for industries seeking to ensure the quality and durability of their products under different environmental conditions.

Features:

Product Name: IPX1-2 Water Drip Test Equipment

Protection Level: IPX1-2

Material: Stainless Steel

Test Time: 10 Minutes

Drip Volume: 1-2 mm/min

Features: Waterproof Test

Details:

Fixing screw

Limit switches

Technical Parameters:

IP Grade	IPX12
Rotating Speed	1-5 Rounds Per Minute
Protection Level	IPX1-2
Drip Volume	1-2 mm/min
Test Method	Drip Test
Display	Touch Screen
Material	Stainless Steel
Drip Distance	200 mm
Test Time	10 Minutes
Test Chamber Material	Stainless Steel

Applications:

The YUEXIN IPX1-2 Water Drip Test Equipment is a reliable and efficient solution for conducting IPX1-2 rain drip tests, rainfall tests, and moisture ingress tests. This equipment is designed and manufactured in Guangdong, China, ensuring high quality and performance standards.

With certifications including ISO 20653:2013, DIN 40050-9:1993, IEC60529:2013, and VW 80000:2017, the YUEXIN IPX1-2 Water Drip Test Equipment guarantees compliance with international testing standards.

Whether you require a single piece or more, the minimum order quantity of 1 piece makes it convenient for various testing needs. The price range of USD 20000-50000+ per piece ensures affordability without compromising on quality.

Packaged in a wooden box for secure transportation, the delivery time for the equipment is 30-45 days, making it a time-efficient choice for your testing requirements. Payment terms are flexible with T/T accepted.

With a supply ability of over 100 pieces every 30 days, you can rely on the YUEXIN IPX1-2 Water Drip Test Equipment for consistent testing operations. The test time of 10 minutes allows for quick and accurate results.

Constructed with stainless steel, the test chamber of this equipment ensures durability and longevity. The drip distance of 200 mm caters to various testing scenarios, providing flexibility and accuracy in the testing process.

Overall, the YUEXIN IPX1-2 Water Drip Test Equipment is the ideal choice for waterproof testing applications in diverse industries. Its protection level of IPX1-2, along with its features specifically designed for waterproof testing, makes it a valuable asset for ensuring product quality and safety.

Packing and Shipping:

Product Name: IPX1-2 Water Drip Test Equipment

Description: The IPX1-2 Water Drip Test Equipment is designed to test the protection against vertically falling water drops.

Package Contents: - IPX1-2 Water Drip Test Equipment - User Manual - Power Cord

Shipping Details: - Shipping Method: Standard Shipping - Estimated Delivery Time: 5-7 business days - Shipping Cost: Calculated at checkout
