

IPX3 IPX4 Water Spray Nozzle , Portable Handheld Sprayer For Waterproof Test

Our Product Introduction

for more products please visit us on rainestchambers.com

Basic Information

- Brand Name: YueXin
- Certification: CE Certification
- Model Number: YX-IPX34A
- Minimum Order Quantity: 1 Pcs
- Price: Usd+20000-50000+pcs
- Packaging Details: Wooden Box Package
- Delivery Time: 30-45 Days
- Payment Terms: T/T
- Supply Ability: 100+pcs+30

Product Specification

- Operation Scenarios: Rain、Splash Water
- Spray Method: Side Spray
- Test Method: Spray Nozzle
- Viewing Window: Tempered Glass
- Service Environment: Rain、Splash Water
- Power Supply: 220V/50Hz
- Name Of Commodity: Rain Spray Test Equipment
- Ip Rating: IPX3-4
- Highlight: IPX3 IPX4 Water Spray Nozzle, Portable Handheld Sprayer Nozzle, Waterproof Test Spray Nozzle

Product Description

IPX3-4 Water Spray Test Nozzle without Flow Meter

Product Description:

The IPX3-4 Rain Spray Test Equipment is a specialized testing apparatus designed for conducting water spray tests according to IPX3 and IPX4 standards. This equipment is ideal for evaluating the ingress protection capabilities of products against rain and splash water. With an IP rating of IPX3-4, this testing equipment is suitable for simulating various environmental conditions to assess the degree of protection provided by a product's enclosure against water intrusion. It is an essential tool for manufacturers, quality control departments, and testing laboratories in ensuring compliance with industry standards and regulations.

The Rain Spray Test Equipment operates based on the spray nozzle test method, which involves subjecting the test sample to a controlled water spray at different angles and intensities. This allows for a thorough evaluation of the product's resistance to water ingress under simulated rain or splash water conditions.

Key Features of the IPX3-4 Rain Spray Test Equipment:

Designed for IPX3 and IPX4 water spray testing

Suitable for rain and splash water simulation

IPX3-4 IP rating for comprehensive water ingress testing

Utilizes the spray nozzle test method for accurate evaluation

Ensures compliance with industry standards and regulations

Ideal for manufacturers, quality control departments, and testing laboratories

Provides reliable and repeatable test results

Overall, the IPX3-4 Rain Spray Test Equipment is a reliable and efficient solution for conducting water spray tests to assess the ingress protection capabilities of products. Whether testing consumer electronics, outdoor equipment, lighting fixtures, or any other products susceptible to water exposure, this equipment offers the necessary tools for thorough evaluation and validation.

Investing in the IPX3-4 Rain Spray Test Equipment ensures that products meet the required standards for water resistance and durability, providing peace of mind to manufacturers and consumers alike. With its user-friendly design, accurate testing capabilities, and compliance with IPX3 and IPX4 standards, this equipment serves as a valuable asset in the development and quality assurance of various products.

For a comprehensive IPX3-4 Water Spray Test Equipment solution, the IPX3-4 Water Ingress Test System offers the necessary features and capabilities to meet your testing requirements. Trust in the reliability and accuracy of the IPX3-4 Water Ingress Test System for conducting thorough water ingress tests and ensuring the quality and performance of your products.

Details:

Pressure gauge

the appearance of shower head

Features:

Product Name: IPX3-4 Rain Spray Test Equipment
IP Rating: IPX3-4
Spray Method: Side Spray
Power Supply: 220V/50Hz
Working Scenarios: Rain, Splash Water

Technical Parameters:

Material	Brass Material
Service Environment	Rain, Splash Water
Spray Method	Side Spray
Ip Code	IPX3 IPX4
Number Of Spray Holes	121
Flow Regulation Mode	Manual Setting
Water spray hole size	φ0.5mm
Water flow	10L/min±5%
Name Of Commodity	Rain Spray Test Equipment
Water pressure range	50-150Kpa

Applications:

The YueXin IPX3-4 Rain Spray Test Equipment is a cutting-edge product designed for a variety of product application occasions and scenarios. With its advanced features and reliable performance, this equipment is suitable for a wide range of industries and purposes. One of the key attributes of the YueXin Rain Spray Test Equipment is its versatility in testing products for their resistance to water and rain. This makes it an ideal choice for industries such as electronics, automotive, lighting, and outdoor equipment manufacturers. Whether you need to test the waterproof capabilities of electronic gadgets, automotive components, outdoor lighting fixtures, or any other product, the IPX3-4 Raindrop Spray Testing Device is the perfect solution. Its IPX3-4 Drip Box Test Instrument functionality allows for precise and accurate testing according to international standards. Manufactured in Guangdong, China, this CE-certified equipment ensures high quality and reliability. The minimum order quantity is just 1 piece, making it accessible to businesses of all sizes. The price ranges from USD 20,000 to 50,000 per piece, with packaging details including a wooden box for secure transportation. With a delivery time of 30-45 days and payment terms of T/T, the YueXin IPX3-4 Waterproof Test Equipment offers convenience and efficiency. Its supply ability of over 100 pieces per month ensures timely availability. The Rain Spray Test Equipment is designed for service environments that involve rain and splash water, providing essential testing capabilities for a wide range of products. The 7-inch PLC touch screen controller allows for easy operation and monitoring of test processes. Overall, the YueXin IPX3-4 Rain Spray Test Equipment is a reliable and efficient solution for conducting waterproof tests on various products. Its IPX3-4 Waterproof Test Equipment capabilities, combined with its user-friendly design and certification, make it a valuable asset for industries seeking to ensure product quality and performance.

Support and Services:

The IPX3-4 Rain Spray Test Equipment is designed to provide comprehensive testing capabilities for assessing the resistance of products to rain and water spray. Our product technical support team is available to assist you with setup, troubleshooting, and calibration

of the equipment to ensure accurate and reliable testing results.

In addition to technical support, we offer a range of services for the IPX3-4 Rain Spray Test Equipment, including maintenance contracts, training programs, and customization options to meet your specific testing requirements. Our team is committed to delivering exceptional service to help you maximize the performance and efficiency of your testing processes.

About us:

FAQ:

Q: What is the brand name of the Rain Spray Test Equipment?

A: The brand name of the Rain Spray Test Equipment is YueXin.

Q: Where is the Rain Spray Test Equipment manufactured?

A: The Rain Spray Test Equipment is manufactured in Guangdong, China.

Q: Does the Rain Spray Test Equipment come with any certification?

A: Yes, the Rain Spray Test Equipment is CE certified.

Q: What is the minimum order quantity for the Rain Spray Test Equipment?

A: The minimum order quantity for the Rain Spray Test Equipment is 1 piece.

Q: What are the packaging details for the Rain Spray Test Equipment?

A: The Rain Spray Test Equipment is packaged in wooden boxes.
