

IPX3-4 Rain Spray Test Equipment for Water Spray Functionality Verification

Our Product Introduction

for more products please visit us on raintestchambers.com

Basic Information

- Brand Name: YueXin
- Certification: CE Certification
- Model Number: YX-IPX34AM
- Minimum Order Quantity: 1 Pcs
- Price: Usd+20000-50000+pcs
- Packaging Details: Wooden Box Package
- Delivery Time: 30-45 Days
- Payment Terms: T/T
- Supply Ability: 100+pcs+30

Product Specification

- Ip Code: IPX3 IPX4
- Ip Rating: IPX3-4
- Spray Method: Side Spray
- Operation Scenarios: Rain、 Splash Water
- Test Method: Spray Nozzle
- Working Scenarios: Rain、 Splash Water
- Name Of Commodity: Rain Spray Test Equipment
- Number Of Nozzles: 4
- Highlight: **IPX3-4 Rain Spray Test Machine, Verification Rain Spray Test Machine**

Product Description

IPX3-4 Rain Spray Test Equipment for Rain and Splash Water

Product Description:

The IPX3-4 Rain Spray Test Equipment features a sturdy viewing window made of tempered glass, allowing you to observe the testing process with clarity and precision. The IPX3-4 rating signifies the high level of protection this machine offers against water ingress, making it ideal for a wide range of applications in various industries.

With a test method utilizing a spray nozzle and a side spray mechanism, this IPX3-4 rainproof test machine ensures thorough and consistent testing of your products. The water spraying test device is capable of delivering precise and controlled water flow, simulating real-world conditions to assess the performance of your products under different levels of water exposure.

Whether you are testing electronic devices, outdoor equipment, or other products that require reliable waterproofing, the IPX3-4 Rain Spray Test Equipment is a valuable asset for your quality assurance process. By subjecting your products to rigorous testing with this machine, you can identify any potential vulnerabilities to water ingress and make necessary improvements to enhance their durability and reliability.

Investing in IPX3-4 waterproof test equipment is essential for ensuring the quality and performance of your products in challenging environmental conditions. With the IPX3-4 Rain Spray Test Equipment, you can rest assured that your products meet the highest standards of water resistance and durability, giving you and your customers peace of mind.

Don't compromise on the quality of your products – choose the IPX3-4 Rain Spray Test Equipment for comprehensive and reliable testing that meets IPX3-4 standards. Enhance the waterproofing capabilities of your products and build trust with your customers by investing in this state-of-the-art testing machine today.

Features:

Product Name: IPX3-4 Rain Spray Test Equipment

Experimental Scenarios: Rain / Splash Water

Spray Method: Side Spray

IP Code: IPX3 IPX4

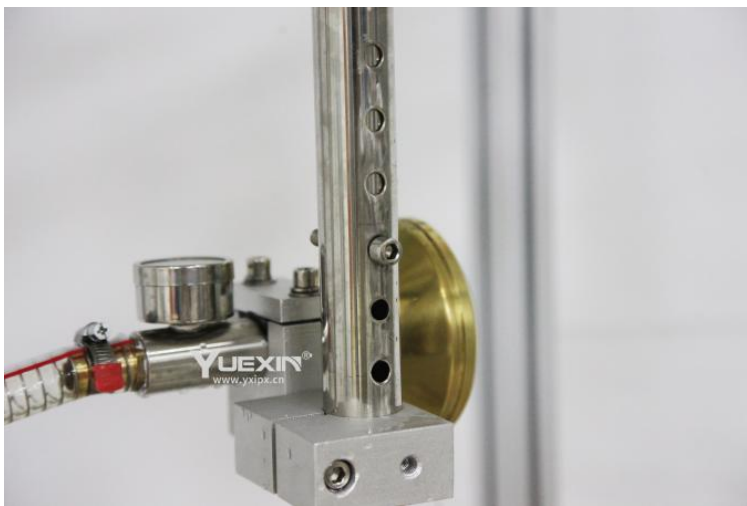

Controller: 7-inch PLC Touch Screen

Working Scenarios: Rain, Splash Water

Technical Parameters:

Viewing Window	Tempered Glass
Applied Scenarios	Rain, Splash Water
Ip Code	IPX3, IPX4
Service Environment	Rain, Splash Water
Spray Method	Side Spray
Working Scenarios	Rain, Splash Water
Controller	7-inch PLC Touch Screen
Experimental Scenarios	Rain / Splash Water
Name Of Commodity	Rain Spray Test Equipment
Test Method	Spray Nozzle

Applications:

The YueXin Rain Spray Test Equipment, also known as IPX3-4 Splashproof Test Apparatus, is a versatile and reliable product designed for various product application occasions and scenarios. This innovative equipment originates from Guangdong, China, and comes with CE Certification to ensure quality and performance.

With a minimum order quantity of 1 piece and a price range of USD 20,000 to 50,000 per piece, this equipment is a cost-effective solution for laboratories, testing facilities, and manufacturers looking to test the water resistance of their products. The packaging details include a sturdy wooden box package to guarantee the safe delivery of the equipment.

The delivery time for the Rain Spray Test Equipment is estimated to be between 30 to 45 days, with payment terms accepted via T/T. The supply ability is more than 100 pieces every 30 days, making it readily available for various industries.

The working scenarios for this equipment include rain and splash water, making it ideal for testing products that are exposed to these conditions. It operates on a power supply of 220V/50Hz and is suitable for experimental scenarios involving rain and splash water.

Service environment for the IPX3-4 Waterproof Test Equipment is optimized for rain and splash water conditions, providing a reliable and accurate testing environment for a wide range of products. The name of the commodity, Rain Spray Test Equipment, reflects its primary function and purpose.

Support and Services:

The IPX3-4 Rain Spray Test Equipment is designed to provide thorough testing of products' resistance to water ingress from rain. Our product technical support team is dedicated to assisting you with any questions or issues you may encounter during the setup, operation, or maintenance of the equipment.

In addition to technical support, we also offer a range of services to ensure the optimal performance and longevity of your IPX3-4 Rain Spray Test Equipment. These services may include calibration, maintenance, and repair to keep your equipment functioning at its best.

FAQ:

- Q: What is the brand name of the Rain Spray Test Equipment?
A: The brand name of this equipment is YueXin.
- Q: Where is the Rain Spray Test Equipment manufactured?
A: This equipment is manufactured in Guangdong, China.
- Q: What certification does the Rain Spray Test Equipment have?
A: The equipment has CE Certification.
- Q: What is the minimum order quantity for the Rain Spray Test Equipment?
A: The minimum order quantity is 1 piece.
- Q: What are the packaging details for the Rain Spray Test Equipment?

A: The equipment is packaged in a wooden box package.
